

VanS

The **VanS Laser Forms** product provides the capability to print standard and custom **VanS** forms (invoices, statements, work orders, packing forms, etc) to HP compatible printers. Companies using **VanS Laser Forms** will realize a savings by using plain paper and laser printers instead of expensive pre-printed forms.

Features and Benefits

- ◆ Templates for standard **VanS** invoices and statements are included with Laser Forms.
- ◆ Compusource personnel will assist in capturing company logos for insertion into statement and invoice forms, or in creating new custom forms.
- ◆ Forms are designed using MS Word, and can be supplied by the customer or developed by Compusource personnel.
- ◆ Additional copies or pages of a document can be routed to a single printer or sent to different laser printers around the office.
- ◆ A unique description can be printed for each page; Accounting Copy, Dispatch Copy, Customer Service Copy, etc.
- ◆ Each copy or page can have specific information blanked out, allowing only the pertinent data to be displayed.

- ◆ Interfaces with **VanS** Fax and **VanS** E-Mail allow **Laser Forms** documents to be automatically printed, faxed, and/or e-mailed. For example, a customer invoice could be printed on an accounts receivable department printer, faxed directly to the customer, and e-mailed to the customer's salesperson, all at the same time.

Requirements

- ◆ Laser printers should be configured as network printers and be connected to printservers on your network.
