

VanS

The **VanS** System provides agents with a direct communications link to the van line's computer system. Additionally, VanS software interfaces exchange registration, revenue, and statement settlement information. The operational features of the interfaces vary depending upon the agent's van line affiliation.

Connections

- ◆ Accomplish a *direct connection* through a number of methods including satellite, digital or analog dedicated lines, and network links.
- ◆ Make a *dial-up connection* through a PC with a modem.

One-Step Registration

- ◆ Transfer order information from the van line's order registration system into VanS.
- ◆ Save time by eliminating the need to re-enter registration information.
- ◆ Minimize errors that occur due to double entry.
- ◆ Depending upon van line affiliation, orders may be transferred immediately (on-line) or periodically (batch).
- ◆ Customize the interface to meet the agent's specific needs.

Statement Reconciliation

- ◆ Allow agents to automatically transfer settlement detail to VanS.
- ◆ Apply payments, create revenue adjustments (optional), and post miscellaneous General Ledger transactions automatically.

Reports include:

- ◆ *Van Line Statement Print*
- ◆ *Reconciliation by Order Total*
- ◆ *Exception Report*
- ◆ *Revenue Adjustment Report*
- ◆ *General Ledger Posting Report*
